

myAXXESS[®] addOn

Next Generation Contactless Payment Reader

Modular RFID reading systems for mounting on metal

OBID myAXXESS® addOn has the same functionality as OBID myAXXESS® flatOne but consists of a reader and external antenna. This makes it ideal for retrofitting of vending machines with a transparent, contactless and EMV Level 1 certified smart card reader.

OBID myAXXESS® addOn girogo also features modular construction but the reader includes a controller that independently supports girogo, without needing an online connection.

OBID myAXXESS® addOn offers

- EMV Level 1 certification
- Modular RFID reading system with a flat external antenna for direct mounting on metal
- Available in two variants:
 - as a transparent ISO14443 smart card reader
 - as a girogo cashless device with MDB interface and GSM (optional)

OBID my AXXESS® addOn / addOn girogo:
Modular RFID reading systems, consisting
of a reader and an external antenna

RFID readers from FEIG ELECTRONIC Quality made in Germany
